EXPERIENCE

SOFTWARE DEVELOPER

ITXI, Beirut

April 2023 - PRESENT

- Developed custom Gutenberg blocks for WordPress sites using React.
- Established robust connections between frontend and backend systems utilizing REST APIs, facilitating smooth data flow and integration.
- Implemented responsive and accessible pages using ReactJS.
- Developed Components using ReactJs and Typescript
- Ensured efficient communication between WordPress websites and databases via PHP and the WordPress API, ensuring streamlined data operations.
- Used UI/UX best practices to create Responsive and user-friendly websites.
- Developed various themes and plugins, providing each website with a unique style and personalized features.
- Enhanced website dynamics by implementing AJAX calls, enabling smoother user interactions without full-page reloads.
- Developed custom JavaScript / jQuery solutions to meet specific project needs, ensuring a tailored and effective approach.
- Implemented SEO best practices, including the use of schemas, to optimize websites for search engines.
- Played a key role in optimizing online stores, particularly with WooCommerce, refining and extending features through custom JavaScript enhancements.
- Significantly boosted the speed of a Magento website through front-end optimizations. Leveraged techniques like conditional rendering to achieve a notable improvement in website performance. Additionally, implemented front-end fixes to enhance user experience and overall site functionality.

WORDPRESS SITE MAINTENANCE

ARF, Yerevan

June 2022 - PRESENT

Responsible for 20+ Wordpress site's daily maintenance. Learned site migrations, fixing critical errors, keeping the sites up-to-date, how Wordpress Databases function, PHP, etc. Also created new sites from scratch with Elementor.

WEB DEVELOPER

HAIRENIK, Boston

August 2021 - PRESENT

I initially developed the company's website using WordPress and have since played a pivotal role in its ongoing maintenance and optimization. My responsibilities include consistently updating the site to ensure its relevance and functionality. Additionally, I implement custom UI fixes to enhance the overall user experience and actively contribute to the overall well-being of the website.
